## GNOME Bugzilla – Create a new Bugzilla account

[Home](#) | [New](#) | [Browse](#) | [Search](#) |   | [Reports](#) | [Help](#) | [New Account](#) | [Log In](#) | [Forgot Password](#)

To create a Bugzilla account, all you need to do is to enter a legitimate email address. You will receive an email at this address to confirm the creation of your account. **You will not be able to log in until you receive the email.** If it doesn't arrive within a reasonable amount of time, you may contact the maintainer of this Bugzilla installation at [bugmaster@gnome.org](mailto:bugmaster@gnome.org).

**PRIVACY NOTICE:** Bugzilla is an open bug tracking system. Activity on most bugs, including email addresses, will be visible to the public. We **recommend** using a secondary account or free web email service (such as Gmail, Yahoo, Hotmail, or similar) to avoid receiving spam at your primary email address.

Email address:

[Home](#) | [New](#) | [Browse](#) | [Search](#) |   | [Reports](#) | [Help](#) | [New Account](#) | [Log In](#) | [Forgot Password](#)

# Confirmación del registro.

**From:** [bugzilla@gnome.org](mailto:bugzilla@gnome.org)  
**To:** [fabio gnome@gmail.com](mailto:fabio gnome@gmail.com)  
**Subject:** Bugzilla: confirm account creation  
**Date:** Wed, 22 Sep 2010 21:55:09 +0000 (UTC) (09/22/2010 05:55:09 PM)

Bugzilla has received a request to create a user account using your email address ([fabio gnome@gmail.com](mailto:fabio gnome@gmail.com)).

To continue creating an account using this email address, visit the following link by September 25, 2010 at 21:55 UTC:

<https://bugzilla.gnome.org/token.cgi?t=0nlqBwbpEK&a=request new account>

If you did not receive this email before September 25, 2010 at 21:55 UTC or you wish to create an account using a different email address you can begin again by going to:

<https://bugzilla.gnome.org/createaccount.cgi>

PRIVACY NOTICE: Bugzilla is an open bug tracking system. Activity on most bugs, including email addresses, will be visible to the public. We recommend using a secondary account or free web email service (such as Gmail, Yahoo, Hotmail, or similar) to avoid receiving spam at your primary email address.

If you do not wish to create an account, or if this request was made in error you can do nothing or visit the following link:

<https://bugzilla.gnome.org/token.cgi?t=0nlqBwbpEK&a=cancel new account>

If the above links do not work, or you have any other issues regarding your account, please contact administration at [bugmaster@gnome.org](mailto:bugmaster@gnome.org).

# Seleccionamos el producto.

## Desktop: Software part of the GNOME Desktop

**alacarte:** Simple freedesktop.org compliant menu editor.

**brasero:** CD/DVD mastering tool for the Gnome Desktop. It has been designed to be simple and easy to use.

**bug-buddy:** A graphical bug reporting tool

**cheese:** Take photos and videos with your webcam, with fun graphical effects

**dasher:** Predictive text entry

**deskbar-applet:** A GNOME applet to allow easy access to various actions within the gnome desktop, like searching, application launching and so on.

**eel:** An extensions library with code intended to be part of glib, gtk+, or one of the other gnome platform libraries some day. Used only by Nautilus at the time of this writing.

**ekiga:** SIP and H.323 VoIP, IP Telephony and VideoConferencing softphone. Previously known as gnomemeeting.

**empathy:** Empathy is a messaging program which supports text, voice, and video chat and file transfers over many different protocols. Empathy uses Telepathy for protocol support and has an user interface based on Gossip. Empathy is the default chat client in current versions of GNOME, making it easier for other GNOME applications to integrate collaboration functionality using Telepathy.

**eog:** Eye of GNOME (EOG) is the image viewer for the GNOME desktop.

**epiphany:** Epiphany is the GNOME web browser based on the WebKit rendering engine.

**epiphany-extensions:** Extensions for the GNOME web browser (Epiphany)

**evince:** Evince is a document viewer supporting several formats like postscript, pdf and dvi. It's designed to be a simple multi-page document viewer.

**Evolution:** Spiffy mail/calendar/addressbook/task list application.

**Evolution Exchange:** Evolution connector [formerly known as Ximian Connector] for Microsoft Exchange

**Evolution Webcal:** Web calendar subscription utility for Evolution Data Server

**Evolution-Data-Server:** The Evolution Data Server backend

**evolution-mapi:** evolution-mapi provides connectivity to Microsoft Exchange 2007 servers using Openchange's libmapi in Evolution.

**fast-user-switch-applet:** Applet for the GNOME panel which provides a menu to switch between users

**file-roller:** A viewer and creator for archive files. More information is available at <http://file-roller.sf.net/>

**gcalctool:** gcalctool is a powerful graphical calculator with financial, logical and scientific modes. It uses a multiple precision package to do its arithmetic to give a high degree of accuracy.

**gconf-editor:** Configuration editor

**gdm:** Gnome Display Manager (the graphical login)

**gedit:** gedit is a small lightweight text editor for GNOME

# Añadimos descripción del fallo (Bug).

## GNOME Bugzilla - Enter Bug: Evolution

[Home](#) | [New](#) | [Browse](#) | [Search](#) |   | [Reports](#) | [Preferences](#) | [Administration](#) | [Help](#) | [Log out](#) fabio@gnome.cl

Before reporting a bug, please read the [bug writing guidelines](#), please look at the list of [most frequently reported bugs](#), and please [search](#) or [Show Advanced Fields](#)

**Product:** Evolution

**OS:**

Linux

We've made a guess at your operating system. Please check it and make any corrections if necessary.

**Summary:**

**Description:**

**Generando “Un buen reporte”.**

**En lo posible Leer**

**<http://bugzilla.gnome.org/bug-HOWTO.html>**

**Debe ser preciso.**

**Ser claro: explicarlo para que otros puedan reproducir el error.**

**Solo abra un reporte por bug, nunca mezclar.**

**Nunca un error es demasiado trivial.**

## **Ejemplos de summary, (Encabezado):**

**Bueno: "Cancelling a File Copy dialog crashes File Manager"**

**Malo: "Software crashes"**

**Malo: "Browser should work with my web site"**

**La descripción de tu reporte debería incluir:**

**Detalle mas acabado del encabezado:**

**“Copie una serie de archivos a la carpeta NN a la carpeta PP y cancele el Dialogo de copiado” .**

**Pasos para reproducir:**

**Abrir \$HOME.**

**Copiar la carpeta NN.**

**Pegar en la carpeta PP.**

**Cancelar el dialogo de copiado.**

**Idealmente también incluir:**

**TraceBack (hilo de trazados de funciones):**

**Es una lista de llamadas a funciones que son llamados en un cierto punto por el programa**

**#<frame number> <random memory address> in <function name> () from <library name>**

## Traceback BUENO!

[New Thread -1228469328 (LWP 7113)]

## Additional Comments:

Thanks for taking the time to report this bug.  
This bug report isn't very useful because it doesn't describe the bug well. If you have time and can still reproduce the bug, please read <http://bugzilla.gnome.org/bug-HOWTO.html> and add a more useful description to this bug.

Commit

# Continua... Importancia

## Importance

The importance of a bug is described as the combination of its [priority](#) and [severity](#), as described below.

## Priority

This field describes the importance and order in which a bug should be fixed. This field is utilized by hackers to prioritize their work to be done. While each term has a description, it is important to note that priority is highly subjective, and bugs can move up or down the priority scale based on subjective questions like 'would we be embarrassed to release the software with this bug.'

**Immediate** This bug blocks development or testing work and should be fixed ASAP, or is a security issue in a released version of the software.

**Urgent** This bug blocks usability of a large portion of the product, and really should be fixed before the next planned release.

**High** Seriously broken, but not as high impact. Should be fixed before next major release. Frequently includes cosmetic bugs of particularly high visibility, regressions from functionality provided in previous releases, and more minor bugs that are frequently reported.

**Normal** Either a fairly straightforward workaround exists or the functionality is not very important and/or not frequently used.

**Low** Just not all that important. Rarely used in GNOME.

## Severity

This field describes the impact of a bug.

**Blocker** Blocks development and/or testing work

**Critical** Crashes, causes loss of data, or is a severe memory leak

**Major** Major loss of functionality - menu item broken, data output extremely incorrect, or otherwise difficult/useless to use.

**Normal** A minor part of the component is nonfunctional or broken.

**Minor** Minor loss of function, or other problem where easy workaround is present.

**Trivial** Cosmetic problem like misspelled words or misaligned text.

**Enhancement** Request for a new feature or functionality.

# Continua... Keyword

Name	Description	Open Bugs	Total Bugs
<b>accessibility</b>	Keyword for bugs related to accessibility issues.	<a href="#">Search</a>	<a href="#">6363</a>
<b>API</b>	Application Programming Interface	<a href="#">Search</a>	<a href="#">1164</a>
<b>BLOCKED_BY_FREEZE</b>	This keyword should be used for bugs for which action can be taken by the maintainer once feature/ui/string/code freeze is removed, but for which all further actions are blocked until that time. Should be reserved for bugs containing a patch.	<a href="#">Search</a>	<a href="#">81</a>
<b>build</b>	problems with the build system, source tree, etc (but not packages)	<a href="#">Search</a>	<a href="#">679</a>
<b>documentation</b>	This bug (or something in it) needs documenting.	<a href="#">Search</a>	<a href="#">1789</a>
<b>gnome-love</b>	Marking a bug with this keyword means that you're willing to help someone fix the bug, or that it should be fixable by a beginner without any help. This should ONLY be set by a maintainer or people familiar with the code base, and ONLY when it looks like a project suitable for a new developer looking for a task.	<a href="#">Search</a>	<a href="#">2850</a>
<b>HELPWANTED</b>	Usually added by component owner: help appreciated here!	<a href="#">Search</a>	<a href="#">184</a>
<b>HIG</b>	Bug reporting an area where an application does not follow the HIG.	<a href="#">Search</a>	<a href="#">612</a>
<b>I18N</b>	This is a internationalization issue. This includes strings not marked for translation, things not working in certain locales etc. This is the infrastructure to support L10N.	<a href="#">Search</a>	<a href="#">2865</a>
<b>keynav</b>	Bug involves keyboard navigation (or lack of).	<a href="#">Search</a>	<a href="#">815</a>
<b>L10N</b>	This is a localisation issue. Including errors in localisations, typos, etc. Adding locations and weather stations is one example. Correcting date and time formats is another.	<a href="#">Search</a>	<a href="#">2932</a>
<b>memory</b>	Keyword for bugs filed about various problems regarding memory, from excessive memory use due to poor design to usage of uninitialized values identified by a tool such as valgrind.	<a href="#">Search</a>	<a href="#">436</a>
<b>mozilla</b>	Caused by mozilla bugs	<a href="#">Search</a>	<a href="#">182</a>
<b>multihead</b>	Keyword for bugs related to multihead displays.	<a href="#">Search</a>	<a href="#">128</a>
<b>perf</b>	A keyword for performance bugs.	<a href="#">Search</a>	<a href="#">617</a>
<b>portability</b>	This keyword indicates that this bug is related to the porting of GNOME to non-linux platforms, to compilers other than gcc, or to architectures other than ia32.	<a href="#">Search</a>	<a href="#">582</a>
<b>pref</b>	The bug is a request for adding a configuration option.	<a href="#">Search</a>	<a href="#">78</a>
<b>printing</b>	printing / preview issues	<a href="#">Search</a>	<a href="#">323</a>
<b>probabledup</b>	This bug is probably a duplicate of another bug but the person who added the designation doesn't have the time to search for the original offhand.	<a href="#">Search</a>	<a href="#">1566</a>
<b>qa</b>	bugs that describe testing that needs to be done (and can be done by non-programmers)	<a href="#">Search</a>	<a href="#">242</a>

<https://bugzilla.gnome.org/describekeywords.cgi>

# Continua... Whiteboard

## Bugzilla Whiteboard Topics

### **evolution[accounts]** [Search Bugzilla](#)

Bugs related to account setup, management, implementation, etc. Primarily for mail accounts but may also apply to remote address book or calendar accounts.

### **evolution[attachments]** [Search Bugzilla](#)

Bugs related to email and iCalendar attachments. Applies to both Evolution and Evolution-Data-Server products.

### **evolution[caldav]** [Search Bugzilla](#)

Bugs related to interacting with CalDAV servers. Applies to both Evolution and Evolution-Data-Server products.

### **evolution[categories]** [Search Bugzilla](#)

Bugs related to categories for calendar events, tasks and memos. Applies to both Evolution and Evolution-Data-Server products.

### **evolution[cleanup]** [Search Bugzilla](#)

Bugs related to cleanup chores: fixing compiler warnings, refactoring, migrating away from deprecated API, etc.

### **evolution[compeditor]** [Search Bugzilla](#)

Bugs related to the editor window for calendar events, tasks and memos.

### **evolution[composer]** [Search Bugzilla](#)

Bugs related to Evolution's mail composer. Applies to both Evolution and [GtkHtml](#) products.

### **evolution[dbus]** [Search Bugzilla](#)

Topic for bugs related to the replacement of Bonobo with D-Bus in Evolution-Data-Server 2.30.

### **evolution[disk-summary]** [Search Bugzilla](#)

Transient topic for bugs related to the SQLite-based *disk-summary* feature in Evolution 2.24.

### **evolution[etable]** [Search Bugzilla](#)

Bugs related to Evolution's infamous ETable widget.

### **evolution[express]** [Search Bugzilla](#)

Bugs related to Evolution's "express" mode.
